

## Hydrogen and Carbon Summit

**Topics:** + Pyrolysis of biomass, bio- and natural gas

- + Utilisation of carbon, hydrocarbons and hydrogen
- Topics of electrolysis and the use of fossil coal will be excluded

**Date:** 26 September 2023

**Venue:** KAM Center of Mediterranean Architecture, Chania, Greece  
<https://conference.eurecapro.eu/venue/>

EURECA-PRO cordially invites the researchers of the consortium for a day of scientific exchange and networking in the field of pyrolysis of bio- and natural gas as well as the utilisation of carbon, hydrocarbons and hydrogen. The purpose of the summit is to identify common research ambitions, get to know the expertise of all EURECA-PRO partner universities and initiate joint research activities to boost scientific research and innovation. A total number of 205 publications in the given topics have already been collected, which will be made available to the participating researchers. The submissions were used to determine the thematic framework of the summit.

### Preliminary Programme:

EURECA-PRO HYDROGEN AND CARBON SUMMIT	
26.09.23	PROGRAMME
09:00-09:30	Welcome and Registration
09:30-11:00	Keynote addresses
11:00-11:30	Coffee break
11:30-13:00	Parallel sessions
13:00-14:00	Lunch break
14:00-15:00	Sum-up and Conclusions

The summit takes place directly before the 3rd EURECA-PRO Conference on Responsible Consumption and Production (<https://conference.eurecapro.eu/>) and thus provides a unique opportunity to spend a scientific week in Chania.

A list of accommodation options can be found here:
